October 17, 2012

Dear Operational Manager / HR Officer,

We are writing to introduce you to the Trans-Help Foundation, a national charity providing support and assistance to transport personnel and their families.

Established in 2005, the Foundation has supported over 10,000 transport families through our 24/7 national 1300 support line; mobile health & support units which traverse transport corridors providing preventative health checks/general support; and our national respite facility. We also have support network across the country to assist those in need of critical incident response.

For a small donation our Mobile Health & Support Units can be booked to attend your depot. We are flexible on the times we attend as we do understand the industry and the need for flexibility. The "Onsite Company Health Assessment" attendance is an excellent way for you to fine tune the health of your company, not only the drivers but also management, office and depot staff, especially with the introduction of CoR.

On completion of the attendance the company will be provided with an overview of the results, whilst the participants can be guaranteed of privacy and confidentiality. For a health unit to attend a booking would be required, with a minimum booking fee of \$200.

Our services are diverse, from assisting widows, families and workmates following accidents to supporting drivers suffering road trauma or other issues which can affect their ability to drive. Our work has proven to save lives, make our roads healthier and in turn saving company's time, money and reduce the possibility of accidents/incidents.

We recognise how busy you are and enclose a CD for your perusal. The CD provides an overview behind the scenes of the Foundation and a complimentary PDF booklet for your drivers who are suffering Heavy Vehicle Road Trauma and Stress. Also enclosed is a sample brochure, support card for drivers and truck windscreen sticker. We would be only too pleased to provide you a pack for all your drivers and enclose a request form.

Trans Help Foundation also has a Workplace Giving Program where drivers and staff can commit to making a weekly donation to the Trans-Help Foundation. Further information is on the CD.

The foundation's goal is that all transport personnel are aware of our service and know about us without ever needing us, rather than one day needing us and not knowing.

I would welcome the opportunity to meet with you personally to discuss Trans Help Foundation with you further and finish with a testimony of the work we do.

Trans-Help have assisted us at RFT on a number of occasions with major accidents and traumatic events encountered by our drivers and operations personnel.

The feedback from our employees after contacting the Trans-Help service has been full of praise at the high level of support that was offered at the time that they were experiencing shock and at times deep distress.

The personal support offered by Di and her team has been greatly appreciated with follow up and resources provided for us to distribute to employees to assist them as well.

In addition, I personally have had a great deal of support from Di having previously worked at Border Express and Di assisted in providing us with the Trans-Help brochures and cards in addition to the Beyond Blue Resource "Taking Care of Yourself and Your Family" for the 450 employees nationally. Our drivers also utilise the Mobile Health Van.

*We would be lost without this industry specific help line and admire the work that Di and her team do tirelessly to look after the drivers in our industry to assist them and their families when they are in distress. This is a one of a kind tailored professional service that is great for all transport operators. **Jacinta Macaulay - Ron Finemore Transport***

Yours sincerely

Dianne Carroll OAM
